Rohan Bhatnagar – Resume

AI Data Analyst | Data Scientist | AI/ML Engineer

Hyderabad, TS 500049 | +91 9406679018 | rohan.code2005@gmail.com | LinkedIn | GitHub

Professional Summary

Data Scientist and AI/ML Engineer who builds machine learning, NLP and BI solutions in Python, SQL, TensorFlow and Power BI. Cut processing latency from 8s to under 2s and manual effort by 80% on a production data pipeline as a Data Scientist Intern. Built end-to-end projects, including a RAG application and a Spark-based recommendation system, and turns data into clear recommendations for stakeholders.

Technical Skills

- **Programming:** Python, SQL
- **BI & Analytics:** Power BI, Advanced Excel (Power Query, Lookups, What-If Analysis), KPI Dashboards
- **Data Analysis & Visualization:** EDA, Pandas, NumPy, Matplotlib, Seaborn
- **Machine Learning:** Regression, Classification, Model Evaluation, Scikit-Learn
- **Deep Learning:** ANN, CNN, RNN, LSTM, TensorFlow
- **NLP & Generative AI:** Tokenization, Embeddings, NER, Text Classification, LLMs, RAG, Transformers, Hugging Face, LangChain, AI Agents
- **Databases & Tools:** Milvus, Redis, Beautiful Soup, Requests, Git, GitHub

Work Experience

Data Scientist Intern | Naresh I Technologies — June 2026 – Present

- Developed machine learning models in **Python and TensorFlow** to predict safety risks with **92% accuracy**.
- Automated data ingestion and preprocessing for **10K+ daily reports**, reducing manual effort by **80%**.
- Built **Power BI dashboards** to track safety trends and KPIs, turning data into clear recommendations for stakeholders.

- Optimized data pipelines using **Redis caching** and XML processing, cutting latency from **8s to under 2s**.

Projects

Smart Document Processing Suite (RAG Application)

- Built an end-to-end AI application that extracts and preprocesses text from PDFs and answers queries using RAG with BERT embeddings.
- Trained and tuned BERT models for embeddings; set up and managed Milvus for embedding storage and retrieval.
- Designed the overall system architecture and data-handling pipeline.
- **Tech:** Python, TensorFlow, BERT, Milvus, NLTK, Hugging Face Transformers, LLMs, RAG

Scalable Movie Recommendation System

- Designed a distributed collaborative filtering recommendation engine using Apache Spark on the MovieLens 25M dataset.
- Implemented ALS-based model training for large-scale sparse data, optimizing resource allocation and accuracy.
- Deployed the model to AWS for batch inference and performance monitoring.
- **Tech:** Apache Spark, ALS, AWS

Education

Bachelor of Technology in Computer Science (AI Specialization) — Mandsaur University, MP — Aug 2023 – May 2027

- Coursework: Machine Learning, Artificial Intelligence, Cloud Computing (AWS), Data Mining, Big Data Analytics, Constraint Solving

Certifications

- Generative AI Specialization — Coursera (In Progress): LLMs, Prompt Engineering, RAG
